

MANAWATU ARCHERY CLUB - INFORMATION ON ROUNDS SHOT

Table A shows the distances shot for the 1440 round which encompass 36 arrows shot at each of 4 different distances. Each round in this table is listed vertically. In contrast the 720 rounds encompass 36 arrows shot twice at the same distance.

Table B show the rounds shot by recurve female, recurve male, compound female and compound male archers. Distances 1 and 2 ("dist 1|2" in the below) are shot on the same target face, as are

distances 3 and 4 ("dist 3|4"). The word "full" to describe a target face indicates the full 10 zone scoring, whereas "5to10" indicates that only the 5 to 10 scoring zones are found on the target, i.e. no black or white outer rings are present.
